

CNC Wire Bender

SERVO DRIVEN

OPERATOR INTERFACE: use hand dial to set home position or angles.

UNLIMITED ANGLE: continuous coiling is even possible

BEND SPEED adjust acceleration or deceleration.

PARTS COUNTER
ADJUSTABLE HOME POSITION
 move "home" and retain angles

QUICK CHANGE TOOLING

The all new JK series of programmable CNC tabletop benders has revolutionized the wire bending industry. Finally, there is a machine without stops to set or rotational limitations. Simply dial in your bend angle (right or left), hit enter, and the bend is programmed. Make up to 9 different bends in sequence or store up to 30 steps in memory. This machine is so easy to learn, you can use most of the features in 15 minutes or less.

General Specifications*

MODEL	MAX WIRE	BEND SERVO	BEND DISC	TABLE			BEND RPM	BEND ANGLE
				W	L	H		
JK 250SH	.250"	1	4"	24"	48"	30"	0-110	NO LIMIT
JK 500SH	.500"	1	8"	36"	72"	30"	0-110	NO LIMIT
JK 625 SH	.625"	1	8"	36"	72"	30"	0-110	NO LIMIT
JK 1000 SH	1.000"	1	12"	36"	72"	30"	0-20	NO LIMIT
